

## Weaver RS-110 Offset Worksheet

A: \_\_\_\_\_

The distance from the outside edge of the swim platform to the point where the offset starts angling down. For getting over the rub rail or curve of swim platform. **MAXIMUM - 4"**

B: \_\_\_\_\_

The drop of the offset: to measure this get in the dinghy (how you would be getting into it 99% of the time). Measure 2.5" above the rub rail on the dinghy mark with tape. Then measure from that point to top of swim platform. **MAXIMUM - 6"**

**The minimum total length out of the offset is 8". The further out and down the longer the offset becomes.**
